## A Message From Your Firewise Committee

In conjunction with Granby Ranch receiving National Recognition from the Firewise USA® Program, the Firewise committee would like to remind homeowners to **Be Wildfire Ready**. Personal responsibility for maintaining individual properties can go a long way in mitigating wildfire risk. As a reminder, the Firewise USA® Program emphasizes **3 Home Ignition Zones** for fire mitigation.

- Zone 1 is 0-5 feet from the home.**
- Zone 2 is 5-30 feet from the home**
- Zone 3 is 30-100 feet from the home**

The Grand County Wildfire Council's website <https://bewildfireready.org/> is an excellent resource for homeowners looking to mitigate wildfire risk to their property within the 3 ignition zones. The council has recently added defensible spaces tools to the website and homeowners can complete the **Defensible Space & Home Hardening Self-Assessment Survey** to determine a property's readiness for wildfire. The survey can be accessed at the following website:

<https://bewildfireready.org/defensible-space-tools/>

As a reminder, some initial preventative measures individuals can take to mitigate their properties risk include the following::

- Flying embers are the most common home ignition source during wildfires. Place ember guards (1/8" hardware mesh) on all soffit vents and air intakes.
- Replace mulch and grass with non-combustible materials, such as rock, in Home Ignition Zone 1.
- Keep leaf and needle debris cleared from roof and Zone 1.
- Prune tree limbs 6' – 10' above the ground where possible.
- Prune tree branches from hanging over roof lines and trim shrubbery from touching the house.
- Keep native grasses mowed to four inches or less.

Residents interested in cleaning up their yards and disposing of combustible material can take advantage of the Grand County Community Chipping Days listed on the following website:

<https://bewildfireready.org/community-chipping-days/>
